Learn in a hands-on repair shop environment

The **Auto Repair Technician** program at Lake Washington Institute of Technology is one of the state's leading auto repair programs. This program provides you with high-tech, professional skills that will keep you in constant demand and open doors to numerous career opportunities.

Our affordable program features a hands-on auto repair learning environment with current tools, equipment and computerized instruments available. The class area is **designed to simulate an actual industry repair shop** environment. Students can obtain a General Service Technician Certificate of Completion (2 quarters), a Certificate of Proficiency (5 quarters), or a two-year Associate in Applied Science degree (5 quarters).
